Medical certificate

This is to certify that Mrs / Mr,
passport no., PESEL no.
suffers from type 1 diabetes mellitus and is treated with
insulin pens (insulin delivery syringes).

Due to specifics of the medical treatment with insulin pens, as well as impossibility to purchase pens' accompanying equipment outside of the place of patient's residence, the patient needs to carry all necessary items in hand carry-on luggage. Lack or loss of any of these items will result in discontinuation of diabetes therapy for the patient and may trigger serious health issues as well as lead to life threatening consequences.

Patient treated with insulin pens needs to carry the following items in hand carry-on luggage:

- Insulin
- Insulin pens (syringes) and needles
- Finger pricking lancets
- Glucose meters and test strips
- Gluca-gen hypo kit (lifesaving device)
- Disinfecting and dressing items
- Glucose in gel and in pills
- Continuous Glucose Monitoring system
